

NORTHSTAR
OFFICE + ACCOUNTING

Deep Scan & Valuation Report

NorthStar Office & Accounting LLC

<https://northstarofficexaccounting.netlify.app/>

Scan date: February 25, 2026

Certified Valuation (Website Asset)

\$79,500

Band: \$55,000 - \$95,000 | Deposit (30%): \$23,850

This binder values the website as a digital asset (site + content + conversion surfaces), not the operating business.

Valuation number

Certified valuation: \$79,500 (band \$55,000 - \$95,000).

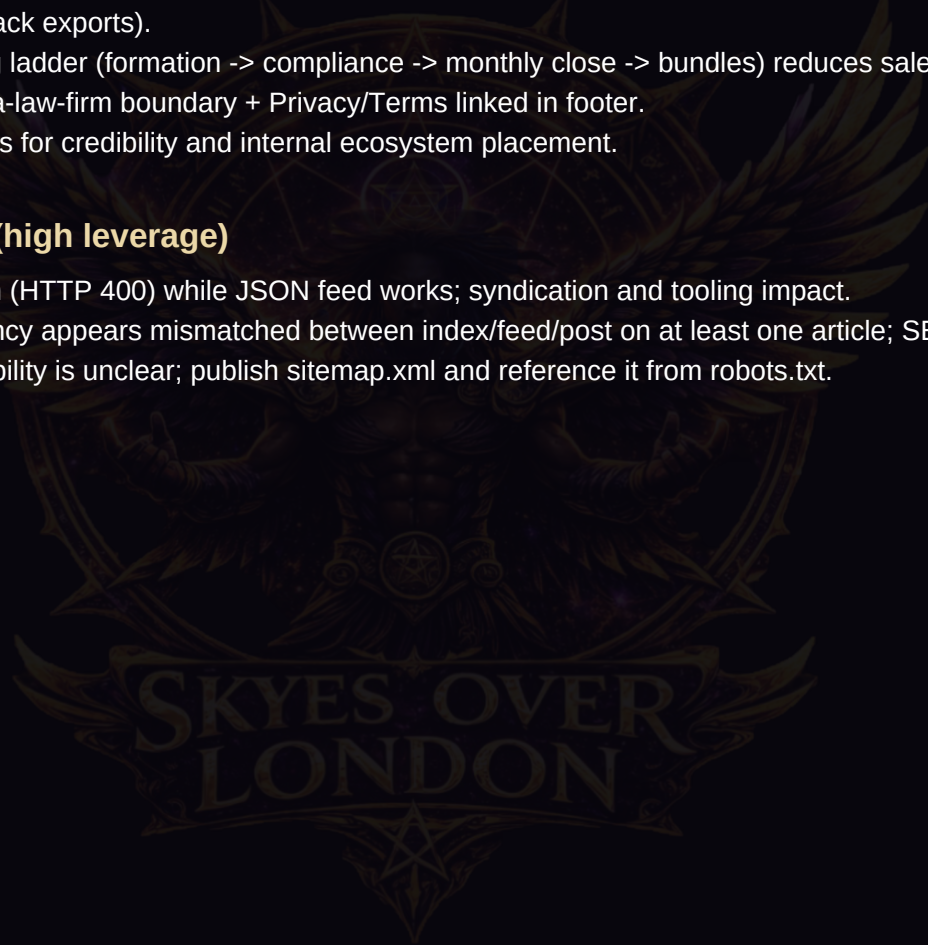

Suggested deposit at 30%: **\$23,850**.

Executive summary (public scan)

- Clear Phoenix-first positioning and operator cadence language (48-72h typical launch window; close packets; evidence pack exports).
- Transparent pricing ladder (formation -> compliance -> monthly close -> bundles) reduces sales friction.
- Trust posture: not-a-law-firm boundary + Privacy/Terms linked in footer.
- Leadership surfaces for credibility and internal ecosystem placement.

Red flags to fix (high leverage)

- RSS feed is broken (HTTP 400) while JSON feed works; syndication and tooling impact.
- Blog date consistency appears mismatched between index/feed/post on at least one article; SEO trust ding.
- Sitemap discoverability is unclear; publish sitemap.xml and reference it from robots.txt.

Inventory overview

Area	What exists	Why it matters
Core navigation	Services, Leadership, Blog, Ecosystem, Intake, Privacy, Terms	Complete funnel from pitch -> pricing -> intake.
Pricing ladder	Multiple SKUs with monthly cadence options	Strong monetization surface.
Content engine	Blog with Phoenix Operator Series + archive	Local SEO compounding asset.
Trust surfaces	Privacy + Terms, legal boundary copy	Reduces enterprise friction.

Pricing surface (sample)

Package / SKU	Public price	Notes
LLC Launch (Starter)	\$349	Guided filing support (state fees separate).
Compliance Keeper	\$29 /mo	Ongoing renewal and deadline cadence.
Monthly Close (Starter)	\$349 /mo	Predictable monthly close packet.

Valuation model

Model	Range	What it assumes
Replacement cost	\$35,000 - \$55,000	Rebuild IA, design system, pricing + intake pages, policies, and editorial library.
Market value (asset)	\$55,000 - \$95,000	Premium for Phoenix SEO inventory + conversion readiness; assumes tech hygiene fixed.
Certified valuation	\$79,500	Midpoint leaning premium; discounted for RSS/date/sitemap issues until corrected.

72-hour hardening plan

- Fix rss.xml to return HTTP 200 (or 301 to a valid feed).
- Normalize blog dates (single source of truth used for index + feed + post pages).
- Publish sitemap.xml and reference it from robots.txt; validate in Search Console.
- Add LocalBusiness + Service schema, plus OpenGraph/Twitter cards site-wide.
