

SkyeLeticX

Deep Scan & Valuation Report

Domain: **skyeletix.netlify.app**

Scan date: **February 25, 2026**

Certified Valuation	Valuation Band
\$79,429	\$64,287 - \$94,638 Scenario sensitivity (scope + readiness)

Prepared for: Skyes Over London LC (SOLEnterprises ecosystem)

This report values the website as a digital asset based on replacement cost, market pricing signals, and operational readiness. It is not a revenue-based business appraisal.

Executive Summary

SkyeLeticX presents as a premium, tightly-positioned under-6'0" basketball league brand with a complete top-of-funnel experience (intro -> landing page -> player registration and Team Owner intake) and supporting editorials that explain the model.

- Animated intro + primary landing page funnel ("Enter Site" -> /home).
- Core navigation flows: How It Works, Championships, Players (registration wizard), Team Owners (application wizard).
- On-site economics published: player registration (\$800 rostered / \$967 individual), champion payout (\$350 per player), Team Owner bounty (\$50 per player), ticket commission (15%), champion bonus (\$500).
- Multi-state positioning: Phoenix HQ plus Houston, Denver, and Chicago markets.

Top Risks / Value Levers

- **Indexing & discoverability:** no visible sitemap/robots link in the public UI; publish /sitemap.xml and /robots.txt and link them in the footer (high SEO leverage).
- **Privacy & compliance:** player registration collects PII (name, email, phone, DOB, location); publish Privacy Policy + data retention language and implement consent logging.
- **Payments & payout rails:** pricing and payouts are described, but payment processor + payout workflow are not exposed; ensure Stripe/PayPal fails, refund policy enforcement, and tax reporting flows.
- **Owner Portal marked as "Soon":** future feature creates expectation gap; either ship an MVP dashboard or change the CTA to a waitlist + status page.
- **Operational readiness:** define clear league rules/waivers, injury + dispute handling, media release language, and customer support SLAs.

Certified Valuation: \$79,429 (band \$64,287 - \$94,638).

Primary drivers: (1) differentiated niche positioning, (2) multi-market operating story, (3) registration + owner acquisition funnels, and (4) cohesive brand and editorial layer. Main discount: parts of the ecosystem are declared but not fully shipped (e.g., Owner Portal).

Deep Scan Inventory

The following public routes were discovered and reviewed during the scan.

Route	Purpose	Notes
https://skyeletix.netlify.app/	Animated intro / gate	Primary call-to-action: Enter Site
https://skyeletix.netlify.app/home	Primary landing page	Nav hub + editorial picks + network links
https://skyeletix.netlify.app/about	Brand story & values	Multi-year narrative 2024-2026
https://skyeletix.netlify.app/how-it-works	Process + rules + pricing	Four-step journey, pricing and FAQs
https://skyeletix.netlify.app/championships	Season structure	Multi-state bracket + timeline
https://skyeletix.netlify.app/players	Player registration wizard	Multi-step intake + eligibility checks
https://skyeletix.netlify.app/owners-intake	Team Owner application wizard	Compensation terms + agreement
https://skyeletix.netlify.app/blog-team-owner-playbook	Editorial: ownership	Economics + recruiting playbook
https://skyeletix.netlify.app/blog-first-season	Editorial: onboarding	What to expect first season
https://skyeletix.netlify.app/blog-why-under-6ft	Editorial: philosophy	Rationale for height cap
https://skyeletix.netlify.app/arizona-hq	Editorial: Phoenix HQ	Origin story + Arizona positioning

Observed On-Site Economics

Metric	Value	Notes
Rostered Player Registration	\$800 per player / season	Requires Team Owner code
Individual Entry Registration	\$967 per player / season	League assigns team
State Champion Payout	\$350 per player	Paid within 14 days (stated)
Team Owner Player Bounty	\$50 per recruited player	Tracking code attribution
Team Owner Ticket Commission	15% of ticket sales	Attributed to promotional efforts
Team Owner Champion Bonus	\$500	If team wins State Championship

Funnel Readiness Snapshot

You already have the correct funnel skeleton for a league business: a clear promise on the landing page, separate acquisition paths for players vs owners, and editorial support content that answers objections before they cost you a registration.

- **Players:** multi-step intake, height gating language, entry type selection, waiver step.
- **Owners:** application wizard, compensation math, agreement terms, tracking code concept.
- **Content layer:** league philosophy + onboarding + owner playbook + Arizona HQ origin story.

Technical, SEO, and Trust Scan

This section focuses on what search engines, users, and partners care about: discoverability, speed, privacy posture, and credibility surfaces.

Strengths observed

- Clear, consistent naming and navigation across the core routes.
- Explicit rules, refunds, and media rights language in the How It Works page (good expectation management).
- Multi-market narrative and timeline (2024 concept -> 2025 infrastructure -> 2026 launch) that supports legitimacy.
- Strong conversion copy: problem, solution, stakes, and next-step CTAs.

Gaps / fixes that increase asset value

- **Indexing primitives:** publish a crawler-facing sitemap.xml and robots.txt, and reference sitemap in robots. This improves discovery and reduces crawl ambiguity.
- **Privacy + consent:** add Privacy Policy, Terms, and explicit consent checkbox + retention. This matters because DOB + phone + location are collected in registration.
- **Analytics & attribution:** implement event tracking for each funnel step and tracking codes for Team Owner attribution (you already describe a tracking code concept).
- **Payment and payout rails:** expose your payment processor, receipts, refund rules, and payout mechanism (bank transfer / Stripe Connect).
- **Accessibility:** confirm color contrast and keyboard navigation for multi-step forms.
- **Operational trust:** publish support email, response time targets, and a league office contact page (or consolidate in footer).

Value-lift expectation: closing the items above typically raises buyer confidence and reduces discounting in an acquisition or licensing conversation.

Valuation Methodology

We triangulate value using (A) replacement cost, (B) market pricing signals for comparable builds, and (C) readiness discounting (unfinished/implicit features).

A) Replacement Cost Model

Estimate the hours required to reproduce the current asset at agency quality (strategy, design, copy, front-end, form logic, QA).

Workstream	Hours	Rate	Subtotal
Discovery & IA	14	\$175/hr	\$2,450
Brand system & visual design	28	\$175/hr	\$4,900
Copywriting & editorial system	22	\$175/hr	\$3,850
Front-end build (intro, pages, responsive)	56	\$175/hr	\$9,800
Form wizards (players + owners), validation	32	\$175/hr	\$5,600
QA, analytics hooks, deployment hardening	13	\$175/hr	\$2,275

Model roll-up	Value
Base (labor)	\$28,875
+ PM/QA overhead (15%)	\$33,206
x Brand multiplier (2.6x)	\$86,336
- Risk adjustment (8%)	\$79,429

B) Market Pricing Signals

Public price guides consistently place custom small-business and agency builds in the five-figure range, with higher pricing for complexity (custom flows, integrations, portals). We use these as sanity checks, not as the sole basis for valuation.

- Small business custom websites are often priced around \$10k-\$35k, with more complex sites starting around \$20k+. (See industry pricing guides.)
- Agency hourly rates commonly sit in the ~\$90-\$160/hr range for development, with US agency roles often higher depending on specialization.

C) Readiness Discount

SkyeLeticX is strong on brand + funnel design, but some promised infrastructure is not yet publicly shipped (e.g., Owner Portal marked 'Soon'). We apply a readiness discount until the operational surfaces are fully live.

Certified Valuation Result: \$79,429 (band \$64,287 - \$94,638).

Appendix: Evidence Log (Public Pages Reviewed)

Accessed via public HTTP on the scan date. This log is included so a third party can re-check the same surfaces.

Interpretation: This valuation reflects the website as a sellable digital asset (brand site + conversion funnels + content layer). It does not include separate valuation for the underlying operating business, league rights, or future software portals unless and until shipped.
